- Hardware Skills : Windows 10.
- Tools : Git, GitHub, Visual Studio Code, Jira Software, Bitbucket and Drive IT.

Projects Experience:

Project - 1	IBG I.Serve, The Development Bank of Singapore Limited(DBS)
Position	Angular UI Developer
Project Description	<p>IBG(Institutional Banking Group) I.Serve is the application which works for corporate banking. This application is used by customer service operations teams who directly are in contact with corporate customers for their queries resolving.</p> <p>I.Serve is a one-stop solution to have enhanced SR Dashboard and search functions, and to have customer profile in a single screen, and to have manual authentication with smart answers and easy navigation to products and transaction details.</p> <p>It helps the CSO team to answer customer's queries very fast. It saves a lot of time by not toggling many systems to gather customer information.</p> <p>This application is for Service Requests Management.</p>

	<u>Features of the application:</u> <ul style="list-style-type: none"> ➤ CSO team can create new SR as draft with user query and assign the SR to themselves or their colleagues. ➤ This application helps the CSO team to collect customer information at once in order to raise SR easily. ➤ It has enhanced SR Dashboard and Search function which helps the CSO team to see an overview of individual and team SR Dashboard. It also helps to search customer information by their account number which provides a customer profile in a single screen. ➤ Easy access to SR Inbox for SR with Open or Draft Status. And detailed view of Open and Draft SR upon click of SR. ➤ It allows the creation of SR, Modify SR, Update SR, and Clone SR. ➤ It allows you to send SMS and search about SR and error payments. ➤ It provides an overview of transaction details at any point of time and Fixed Deposit, Loans Details, Debit and Credit cards Informations, and key customer contacts detail. ➤ It allows managers to download reports of SR List and various other reports.
Technical Skills	HTML, SCSS, Javascript, Angular-8, Java as back end.
Tools	Jira Software, Bitbucket and Visual Studio Code

Project - 2	MVP Incentive System, Fiat Chrysler Automobiles(FCA)
Position	Angular UI Developer
Project Description	<p>MVP Incentive System helps dealers to maintain their sales and track their incentives based on the sales. It also tracks their personal loan details and shows them up top 10 and bottom 10 performances of dealers for that quarter on their dashboard.</p> <p>We built an admin system to set up configurations on incentives percentages and criterias for dealers to meet in order to avail incentives for their sales. System also helps to download reports for various aspects in order to see their performances.</p> <p>We have migrated MVP Incentive System which was running on legacy platform with mainframes technology to Angular framework version 8 with Java as back end technology.</p>

	This is where I got a chance to move from mainframes and work on angular framework as UI developer. I handled the UI development part for the website.
Technical Skills	HTML, CSS, Angular Material, Material Flexbox, Javascript, Angular-8, Java as back end.
Tools	Visual Studio Code, Drive IT Service Tool

Project - 3	Piquant Restaurant (Personal Project)
Position	MEAN Full stack developer (Angular as frontend end and Node Js as back end technologies)
Project Description	<p>Piquant Restro is a website collecting restaurants from different places and providing customers to view them all and place their favourite food items with a dummy stripe payment option(card no- 4242 4242 4242 4242).</p> <p>They can also view their placed orders and download an invoice of orders.</p> <p><u>Features of website:</u></p> <ul style="list-style-type: none"> ➤ Users/Admin can sign up, and login with credentials. ➤ Users/Admin can reset their password with OTP receiving on their registered mobile number. ➤ Users/Admin can update their profile information. ➤ Admin can only add/edit/delete restaurant and food items accordingly. ➤ Users can view all available restaurants and place an order with a dummy stripe payment gateway. ➤ Admin can view only restaurants added by them and place an order with dummy stripe payment gateway ➤ Users/Admin can download the invoice in pdf format for their placed orders. ➤ Users will be provided an alert if the page has been idle for 10 minutes, If the user does not click on 'Continue' within 5 minutes of time then the user will be auto logged out from the application. ➤ Super Admin do have all the privileges which users and admin have.
Technical Skills	HTML, SCSS, Angular Material, Material Flexbox, Javascript, Angular-8, Node Js, Websockets.
Tools	Visual Studio Code

Project - 4	Large Order Management System, Fiat Chrysler Automobiles(FCA)
Position	Mainframes Developer
Project Description	<p>LOM (Large order management) system which is to track all the orders placed by the dealers and ensure to keep a temporary block for large quantities of order in order to fulfill other dealers requests in the queue based on parts available inside inventory.</p> <p>System makes a request to the manufacturer with the quantity based on a large order management system orders and ensures parts are reached to inventory in order to fulfill dealer requests by unlocking large orders from the system.</p>
Technical Skills	JCL, COBOL, DB2, CICS, EASYTRIEVE and STP
Tools	Tri-tune, Fault Analyzer, File Manager, DCCS, TSO/ISPF, SPUFI, IBM Utilities and , Panvalet

Project - 5	Claim Processing System, Fiat Chrysler Automobiles(FCA)
Position	Mainframes Developer
Project Description	<p>Claim Processing system which tracks all the claims raised by the dealers and goes through the process of validating each claim with business rules in order to settle them in the system.</p> <p>When a dealer places an order, it gets fulfilled based on parts available in the inventory. Since parts can be shipped by sea, air and by road there are chances to have damaged parts or manufacturing defeat parts too.</p> <p>To fulfill these claim requests from dealers, we had developed a claim processing system for EMEA countries.</p>
Technical Skills	JCL, COBOL, DB2, CICS, EASYTRIEVE and STP
Tools	Tri-tune, Fault Analyzer, File Manager, DCCS, TSO/ISPF, SPUFI, IBM Utilities and , Panvalet

Project - 6	Mopar International Team, Fiat Chrysler Automobiles(FCA)
Position	Mainframes Developer
Project Description	<p>The Mopar International team has 3 major applications. They are Order processing system, Order Shipment and Tracking system and Invoice Processing system in order to receive orders from the dealers, fulfill them based on parts available inside inventory and track them till they reach dealers and process invoice accordingly.</p> <p>I supported these applications and developed some functionalities.</p>
Technical Skills	JCL, COBOL, DB2, CICS, EASYTRIEVE and STP
Tools	Tri-tune, Fault Analyzer, File Manager, DCCS, TSO/ISPF, SPUFI, IBM Utilities and , Panvalet

My Strengths & Achievements:

- I am a self starter and learner. I always try to learn new technologies.
- Received CLP Faculty excellence award for training 80 people on angular framework.
- Received On the Spot award for creating a nice and best looking dashboard for MVP Incentive Systems.
- Received Appreciation Certificate from Customer for successfully deploying major project-LOM (Large Order Management) without any post launch defects.
- Received Appreciation Certificate from Customer for successfully deploying a major project-Claim Processing system for EMEA without any post launch defects.
- Received Star of the month excellence award for being very productive for the team, meeting deadlines all the times without any post launch defects of projects I deployed, helping new joiners both technically and functionally.
- Received Appreciation Certificate from Customer for dedication and continued support to the applications and their business partner.

Educational Background:

- Master of Computer Applications from Sastra Deemed University.
- B.Sc Computers from Nagarjuna University.
